

MSP® Overview

Virtual Short Course

Duration

Overview only – 2 days

Course Description

All organisations and companies undergo continuous change and improvement as a natural process. Programmes represent major change. They are typically complex, difficult and carry substantial risk. Programme Management provides a framework for managing such change. It provides a sound basis for managing collections of related projects that deliver change and benefits to the business.

Programmes involve many parts of an enterprise and can consume a great deal of valuable resources. The impact of not managing them successfully could be considerable. Programmes require effective management to be successful.

This course will give delegates a sound understanding of the principles of effective and successful Programme Management.

Performance-Based Objectives

To provide delegates with a practical understanding of the MSP approach to Programme Management (as documented in the Managing Successful Programmes framework).

This course will enable delegates to:

- Explain the role of programmes in delivering business change.
- Describe the relationship between the MSP Principles, Transformational Flow and Governance Themes.
- Describe the purpose and the correct sequence of processes in the Transformational Flow.
- Describe the overall responsibilities of the programme team.
- Define the fundamental importance of the Governance Themes.
- Apply the MSP Governance Themes to the activities of the Transformational Flow.
- Explain the MSP Principles as applied to the Governance Themes and Transformational Flow

Delivery Method – VIRTUAL Training

Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities virtually delivered on Zoom, Ottawa time – 9 AM – 4:30 PM, with breaks.
